

Note 13 – Segment Information and Geographic Data

The Company manages its business primarily on a geographic basis. The Company's CEO is its CODM.

The Company's reportable segments consist of the Americas, Europe, Greater China, Japan and Rest of Asia Pacific. Americas includes both North and South America. Europe includes European countries, as well as India, the Middle East and Africa. Greater China includes China mainland, Hong Kong and Taiwan. Rest of Asia Pacific includes Australia, New Zealand and those Asian countries not included in the Company's other reportable segments. Although the reportable segments provide similar hardware and software products and similar services, each one is managed separately to better align with the location of the Company's customers and distribution partners and the unique market dynamics of each geographic region.

The CODM uses segment net sales and operating income information to make certain decisions, such as product and service pricing, and to decide how to allocate resources related to sales activities and marketing investments. Net sales for geographic segments are generally based on the location of customers and sales through the Company's retail stores located in those geographic locations. Operating income for each segment consists of net sales to third parties, related cost of sales, and operating expenses directly attributable to the segment. The information provided to the CODM for purposes of making decisions and assessing segment performance excludes asset information.

The following tables show information by reportable segment for 2025, 2024 and 2023 (in millions):
